

Blockchain Unlocked is an invite-only symposium exploring blockchains from multiple perspectives. Sponsored by Cisco and UCL, this half-day event connects startups, investors, corporates, and academics to explore the applications of this nascent and disruptive technology. With top-level keynotes and interactive panels, this event offers a unique opportunity to understand blockchains from a technological, implementation, regulation, and investment point of view. There will be multiple networking sessions throughout the day to enable interaction between the high-level group of professionals we are assembling whom all share a common interest in collaborating on this transformative technology.
